

# INDEX TO THE ANNUAL REPORTS OF THE BIOMETRICS UNIT

BU-205-M

Compiled by: S. R. Searle

## Abstract

This is an accumulated index to the contents of the Annual Reports of the Biometrics Unit, Plant Breeding Department, Cornell University. Entries relate to the Reports themselves and to the books, theses and papers (published and unpublished) written by faculty and students. These are listed after the index proper, under the six headings

BU-	Biometrics Unit Publications
BU- -M	Biometrics Unit Mimeographed Papers
B-	Books
T-	Theses
C-	Computer Program Documentations
O-	All others.

Each entry in these lists shows author(s), title, journal reference (if any), and the Annual Report and page thereof containing the abstract. The BU- and BU- -M numbers used in these lists are those inaugurated in the first Annual Report; the B-, T-, C- and O- numbers are for this index only.

---

## Additions and Corrections

This is the first issue of the index, as prepared by one person. It will be up-dated annually, taking into account any suggestions received for additions, corrections and improvements. Anyone returning a copy of the index so annotated will promptly receive a fresh copy in return; and in due time revised editions will be distributed.

Suggestions for additional entries and cross-references are particularly sought after. The subject-matter entries relating to books, theses and papers are so far based solely on titles. Entries based on content could well be included, and in this regard the entries under design of experiments, estimation, genetics, sampling, statistical genetics and other generic headings are far from complete. Indeed, it is probably debatable as to what should be included under such headings.

# INDEX TO THE ANNUAL REPORTS OF THE BIOMETRICS UNIT

BU-205-M

Compiled by: S. R. Searle

This is an accumulated index to the contents of the Annual Reports of the Biometrics Unit, Plant Breeding Department, Cornell University. Its entries take two forms: for example,

16/2, meaning 16<sup>th</sup> Report, page 2,

12(2,4,7), meaning 12<sup>th</sup> Report, pages 2, 4 and 7.

Not all entries relate directly to Annual Reports. Many refer to the books, theses and papers (published and unpublished) written by faculty and students. These are catalogued after the index proper, under six headings:

BU-	Biometrics Unit Publications
BU- -M	Biometrics Unit Mimeographed Papers
B-	Books
T-	Theses
C-	Computer Program Documentations
O-	All others.

The entries under these headings are in numerical (and hence largely chronological) order, each entry showing author(s), title, journal reference (if any), and the Annual Report and page thereof containing the abstract. (Annual Reports contain lists of publications, followed by abstracts grouped by subject; the lists are not referenced, only the abstracts.)

The numbers appearing under the above headings are used as references in the index proper. The BU- and BU- -M numbers are those inaugurated in the first Annual Report; the B-, T-, C- and O- numbers are for this index only. As an example, under the entries "Truncation", "Robson, D. S." and "Whitlock, J. H." in the index is the reference BU-79, and in the list of BU- papers there is

BU-79 Robson, D. S. and Whitlock, J. H., Estimation of a truncation point. Biometrika, 51, 33-39, 1964. 16/38

This is a published paper, abstracted on page 38 of the 16<sup>th</sup> Annual Report.

When index entries for personnel are particularly numerous they are grouped under five headings:

Vitae:	Vitae information including notes of appointments, attendance at meetings and other activities. (Main vitae references are followed by an asterisk.)
Publications:	Published papers and books.
Mimeos:	Mimeographed papers, theses, and other reports not formally published.
Abstracts:	Book reviews and published abstracts.
Teaching:	Courses, seminars, and general teaching activities.

Code numbers are grouped together: BU- 72,76 means BU- papers 72 and 76.

BIOMETRICS UNIT ANNUAL REPORTS

<u>Number</u>	<u>Year</u>	<u>Number</u>	<u>Year</u>
1	1948-49	11	1958-59
2	1949-50	12	1959-60
3	1950-51	13	1960-61
4	1951-52	14	1961-62
